

Original overall block coverage percentage: 47%

In order to raise the overall block coverage to 65%, the additional number of blocks needed would be 13,028.

The packages that require enhanced tests are:

```
net.fortuna.ical4j.transform  
net.fortuna.ical4j.model.property  
net.fortuna.ical4j.model.parameter  
net.fortuna.ical4j.model.component
```

The package with the least amount of coverage is:

```
net.fortuna.ical4j.model.parameter
```

I did not ration my time properly on this assignment, so by the time I got around to improving the test coverage, I did not have enough time to complete it before the submission deadline. I did look at the code however, and realized that in many classes, there were a great deal of blocks that were not covered, that would not have been difficult to cover. Many of them were simply various constructors. I also noted that in order to increase the coverage amount by any significant percentage, I would need to cover thousands more blocks of code.
